

Kavita Phakey, B.Sc. (Honours), M.Sc, B.Ed.

I am currently teaching Human Biology at National Qualifications Framework Level 3 (equivalent to GCE A-Level). My specific interests are Health and Disease. However, I am very flexible with regard to course content and I have a Masters in Zoology and am a specialist in Fisheries and Limnology.

Several years ago, I became involved with Equivalency Testing as I work with Roger Freestone at a College of Further Education. Through a structured weekly study programme, I enable home study students to practice and prepare for their Science Exam. The student's benefit from focusing on important topics and answering exam style questions, which I assess and provide feedback to. Constructive feedback and positive criticism guides them on how to answer exam style questions and attain their potential. In addition, I mark the terminal exam papers for ET Science.

I look forward to working with you and wish you all the best for your future plans.
